

## Calf Products

- **eCalf P** – a microbial gut inoculant paste for calves.
  - Key ingredients: Lactobacillus Acidophilus, Enterococcus Faecium, dried egg protein, dried whey peptides.
- **eCalf C** – A specifically formulated nutritional supplement designed to provide essential nutrients and energy in a water dispersible form to new born and young calves.
  - Key ingredients: Vitamin C, A and E, Zinc, Copper, B vitamins, dried whey peptides.
- **eCalf S** – A soluble product that can be mixed with water, milk or milk replacer to support gut health. Formulated for new born calves and calves needing a nutritional boost during times of stress.
  - Key ingredients: Vitamin A, D, C and E, B vitamins, Lactobacillus Acidophilus, Enterococcus Faecium, Psyllium husk powder, electrolytes, egg and whey proteins/peptides and betaine.
- **eCow CG** – A nutritional supplement designed to help your calves reach their genetic potential.
  - Key ingredients: Vitamin A, D and E, Zinc, Manganese, Copper, Lactobacillus Acidophilus, Enterococcus Faecium, dried whey peptides and yeast cell wall extracts.

## Calf Program

**At birth:** 6-10 gm eCalf P

**First two feedings after colostrum:** 2 oz eCalf C

**First 7 days after birth:** 1 oz eCalf S per feeding (2 x day)

**eCow CG:** ¼ to ½ oz per head per day once on full feed to 500 lb or breeding age and as desired or needed during stress situations.

**Optional; for calves showing signs of nutritional distress:** 2 oz eCalf S per feeding; 2 oz eCalf C every few days; 10 gm eCalf P as desired.

## Cow Products

- **eDairy P** – For dry and lactating dairy cows, designed to meet the periodic increased nutritional needs of your dairy cows.
  - Key ingredients: Vitamin A, D and E, Proteinated trace minerals (Zinc, Manganese, Copper), Lactobacillus Acidophilus, Enterococcus Faecium, dried whey peptides and kelp.
- **eGold Caps** – To provide nutritional support to the fresh cow and to support metabolic processes affected by other stress situations.
  - Key ingredients: High level of Vitamin C (10,000 mg/dose), Proteinated trace minerals (Zinc, Copper, Manganese), digestive enzymes, Lactobacillus Acidophilus, Enterococcus Faecium, B vitamins and dried whey peptides.
- **ePlatinum Caps** – Veterinarian developed stress capsules designed to provide an additional source of nutrients essential for the proper function of a healthy immune system.
  - Key ingredients: Vitamin E, B vitamins, Proteinated trace minerals (Zinc, Copper, Manganese), digestive enzymes, Lactobacillus Acidophilus, Enterococcus Faecium, dried whey peptides.

## Dry Cow Program

**At Dry off:** 1 x eGold and 2 x ePlatinum bolus.

**45 day dry period:** 1 oz eDairy P per head/day.

**Transition period (2 weeks prior to calving):** 1 x eGold and 2 x ePlatinum bolus; 2 oz eDairy P per head/day.

**Early Lactation:** If convenient, continue feeding 1 to 2 oz eDairy P per head/day for balance of transition period or approximately 3 weeks after calving.
